The handrail is equipped with D-shaped openings to ease exit from the water.

Climbing the **SAFE LADDER** is EASY since the ladder is WIDER and its steps are LONGER than traditional products. The ladder's angle will also provide CONVENIENCE ON YOUR WAY UP.

Unlike traditional systems, the handrail concept is manufactured as ONE SOLID PIECE that anchors to the ladder and the steps like an **A FRAME**.

The strong **WAVY 43\"**

Two ballasts to be filled with sand will **EASE** the original **INSTALLATION** and **REMOVAL** of the step for winterizing if required. You don't need to snorkle with sand bags anymore.

PLEASE NOTE: INSTALL STEP ON FLAT SURFACE.

The Elegant Step and Safe Ladder are ergonomically designed to withstand weight up to 400 lbs. Elegant Step and Safe Ladder are patent pending products. Innovaplas reserves the right to modify its products' specifications, designs or models at any time, without further obligation on its part.

The **CLOSED BACKSIDE** of the Elegant Step will provide you with a SAFER ENVIRONMENT for your children.

The **PIVOTING LADDER** has a unique locking system that will fit pools of 48\", 52\" and 54\". Once it's **LOCKED UP**, your children will be **SAFE IN THE BACKYARD**.
