COMPLIANCE WITH ISPSC 2015 International Swimming Pool and Spa Code

Key Points of Compliance:

- Section 421.5.5, item 2 – Treads are a maximum of 12 inches uniform in height.
- Section 421.10.1, item 1 – Complies with minimum barrier height of 48 inches from ground level.
- Section 421.10.1, item 3 – Smooth finish and design does not contain protrusions/indentations which can be climbed.
- Section 421.10.1, item 8 – Ladder is equipped with locking device/mechanism which is self closing and self latching located more than 54 inches from ground level. Access door opens outwards from the pool.

Note: The mechanism of the Self-Latching system constitutes a locking device under the BOCA regulations. Lumi-O | Innovaplas strongly recommends the use of a padlock when the pool is closed and not in use.
