

# The requirements for a valid warranty of the LED light

- ✔ WINTERIZE the lights. (see procedure A)
- ✔ LOOK AFTER the skylights. (see procedure B) *\* For inground pool only \**
- ✔ Make sure you don't have any problems with soil drainage (no water accumulation in the skylights). *\* For inground pool only \**

*Please note that while the LED light is waterproof, it wasn't designed to be submerged underwater. If that's the case and water makes its way inside, you could use LED lights until having no lighting at all.*

## PROCEDURE A : WINTERIZATION

- 1 Open the round cover on the sidewalk. *\* For inground pool only \**
- 2 Loosen the 3 butterfly screws around the light. **(DON'T REMOVE THEM)**
- 3 Hold the light and turn it at a quarter of a turn.
- 4 Unhook the light from the ring and take it out to the sidewalk.
- 5 Follow the wire to the « Quick-Plug and unscrew the black bolt.
- 6 Separate the wires (male and female).
- 7 The female wire must remain in place inside the junction box and we recommend that you add a fatty substance (for exemple Vaseline) to avoid corrosion.
- 8 Store the light in a dry, heated place if possible.

## PROCEDURE B : MAINTENANCE OF THE HOUSING (LIGHT ACCESS WELL)

*\* For inground pool only \**

- 1 Open the round cover on the sidewalk.
- 2 Check at the bottom of the housing for any residue of sand, dirt, rock or water. You should clean up to allow water to drain quickly in case of heavy rain. (We suggest using a ShopVac style vaccum).

*Please note that at the bottom of the housing, there are holes that allow water to drip. If these become clogged with residue, water could reach the light and damage it, thus voiding your warranty.*

### **WARRANTY**

#### **Inground pool :**

3 years for the LED light from the date of installation by a Lumi-O technician. For the remote control, the transformer and the installation, the warranty is good for a year.

#### **Aboveground pool :**

2 years for the LED light from the date of installation by a Lumi-O technician. For the remote control, the transformer and the installation, the warranty is good for a year.
