SAFE FOR CHILDREN
(FLIP DOOR)

*PADLOCK NOT INCLUDED

New!

The Big Built locking ladder system for InnovaPlas steps is made for heavy weight. The **Big Built is the outside ladder**, not the step.

For more information, please visit
www.innovaplas.com

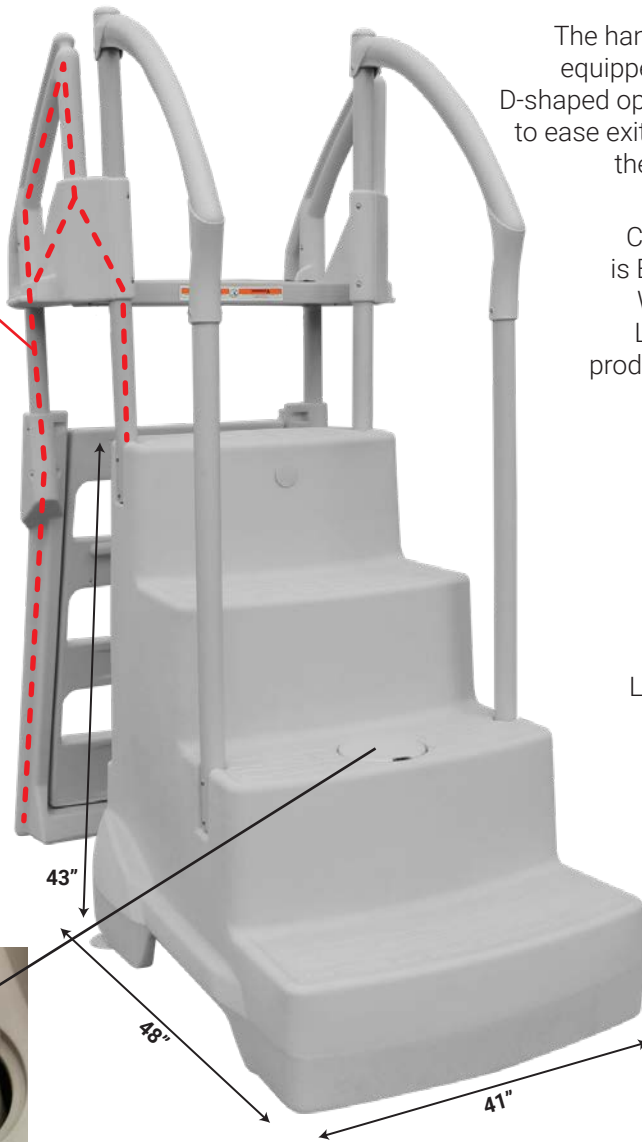

Solidly supported on the ground

Massive grab-rail

Large rotomolded platform

Lift and secure/lock the ladder after swimming

Unlike traditional systems, the handrail concept is manufactured as ONE SOLID PIECE that anchors to the ladder and the step like an **A frame**.

The handrail is equipped with D-shaped openings to ease exits from the water

Climbing the **SafeLadder** is EASY since the ladder is WIDER and its steps are LONGER than traditional products. The ladders' angle will also provide CONVENIENCE ON YOUR WAY UP

Locking the ladder in the down position will secure it when in use in it's frame

Ballast to be filled with sand will FACILITATE the initial INSTALLATION and REMOVAL of the step for winterization if necessary. No more need to struggle with sand bags.

The PIVOTING LADDER has a unique locking system that will fit pools **from 48" to 54"**. Once it's locked up, your children will be **SAFE IN THE BACKYARD**
